### FEEDBACK ANALYSIS

#### 1. Student Feedback Collection Process : LINWAYS

The teaching-learning system followed by any educational institution needs continuous refinement. To capacitate this process of continuous refinement, the institution has adopted a feedback system that takes suggestions from students of each program. This eventually helps to fine-tune the teaching-learning process and the curriculum. The institution follows a well-defined and formal feedback system. It has been identified as one of the important process in our Quality Management System.

The feedback from students regarding the quality of teaching is collected during each semester, through the LINWAYS. In the middle of the semester, the students are asked to respond to a feedback questionnaire with 12 questions. Once the feedback process is complete, the reports are generated automatically based on the formula. The consolidated report containing grade for each course is sent to the respective Heads of the department and the information is disseminated to the faculty in the department. Corrective actions are taken for the faculty members who have obtained 2 and 1 grade points by the Head of the Department.

The evaluation of the feedback by the students is done as follows:

$$\text{Marks} = \frac{((\sum S1) * 5) + ((\sum S2) * 4) + ((\sum S3) * 3) + ((\sum S4) * 2) + ((\sum S5) * 1)}{X * 100}$$

where X is the total number of students participated in the feedback collection process. The grades are assigned with the help of the following grade ranges:

marks	91-100	81-90	71-80	61-70	<=60
Grade point	5	4	3	2	1

Students' feedback regarding the teaching-learning process is also collected from students orally during class committee meetings.

## 2. Course exit survey

At the end of each semester, students are required to complete a semester Course End Survey. In this, students will be required to respond to questions that examine how well they have acquired

the skills on learning the respective course and subsequently attainment of COs and thereby POs attainment is computed.

Sample Course Exit survey

Questionare of Environmental Engineering 2

1. In your opinion what percentage of questions in the university exam were taught in the course work?
2. Effectiveness of online class through linways portal
3. I am able to design circular and rectangular sewers under different flow conditions.
4. I am able to explain sewer appurtenances systems and sewage characteristics.
5. I am able to describe various aspects of primary treatment of sewage and design of various treatment units.
6. I am able to explain secondary treatment methods and various sludge disposal methods.
7. I am able to design septic tank and imhoff tank.
8. Was the course supported by adequate library resources?
9. What are your suggestions to improve this course?

### 3. Student feedback : Graduate survey

Graduate survey for academic year (Batch : 2017-2021) were obtained online . Feedback questionnaire approved by IQAC were circulated to students who cleared all subjects till eighth semester through Google forms and responses were recorded. 40 students of fourth year responded. Evaluation was done on 3 point scale and submitted to DQAC
